## POST-PLANTING MAINTENANCE & MANAGEMENT

**Mowing: During Establishment = mow 8-12" high when the weeds are 8-12" taller than the planted grasses and forbs.**

Mowing may be completed up to three times during the initial growing season (July- October) if needed (not required).  
**Mowing for generic weed control or for cosmetic purposes is prohibited at all times.**

**Herbicide (per label):**

**Cover/Nurse Crop Termination:**

## Seeding Dates

Seeding within the appropriate dates, with the corresponding rates, will enable NRCS to certify the seeding timely. If the seeding is completed outside of the dates on the attached charts, NRCS will verify that the planting was a success (based on germination) prior to practice certification.
