

SPRING WHEAT VARIETIES

LCS TRIGGER

LCS Trigger is a Spring wheat variety released in 2015 by Limagrain Cereal Seeds. It has been a very consistent producer in drier conditions it has been the highest yielding variety in South Dakota State Spring Wheat Variety trials over the past 3 years. With its above average disease resistance traits, and natural use of late season nitrogen, it is a great option in most western regions and drier soil types.

Seeding Rate: 80–100 lb/acre

Seeding Depth: 1"–1 ½"

MN-TORGY

MN-Torgy is a new variety release in 2020 out of Minnesota. It is a very good producer in most regions with more annual rainfall. Known for its grain quality attributes, it's still been a top yielding variety in South Dakota State Spring Wheat Variety Trials. MN-Torgy will perform well in most soils, but we recommend it being used mostly in fertile soils.

Seeding Rate: 80–100 lb/acre

Seeding Depth: 1"–1 ½"
