

## MILLBORN NATIVE MIXES

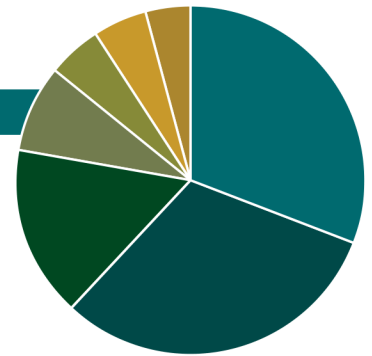

# LITTLE COUNTRY

- › Easy-to-hunt wildlife cover
- › Low maintenance natural landscaping

This short native grass mix is predominantly warm-season grasses that will reach a height of 2'-3'. Little Country™ is a great option for providing wildlife cover that is easy to hunt, or can be used as a low maintenance way to add a natural look to your landscaping. The diversity of this mix makes it easy to grow on most sites and in most soil conditions.

### MIX RATIO

- 31% LITTLE BLUESTEM**
- 31% SIDEOATS GRAMA**
- 16% BLUE GRAMA**
- 8% PRAIRIE JUNEGRASS**
- 5% SAND DROPSEED**
- 5% SLENDER WHEATGRASS**
- 4% VIRGINIA WILDRYE**

\*These amounts are based on percentage of population. Comparable substitutions may be necessary depending on species availability.

### VARIETY PROFILE

Seeding Rate	15 lbs/acre
Seeds per sq.ft	47.4
Seeding Instructions	<ul style="list-style-type: none"> <li>› If broadcasting seed, multiply the seeding rate times 1.5.</li> <li>› If used in a commercial application, multiply the seeding rate times 2.</li> </ul>

**Specialist Establishment Tip:** in all native mixes, you often won't see a mature species during the first season. Weed management and upkeep should be the number one priority during the first year. To give this mix a boost and reduce erosion during establishment, we added QuickGard Sterile Triticale to the mix.
